

**EZ-SAT**  
 Satellite Meter

The new EZ-SAT satellite meter uses the latest developments in satellite identification technology to enable you to make your satellite installations quickly & accurately. The EZ-SAT meter is brought to you by the manufacturers of the BIRDOG series of satellite meters, PerfectVision Manufacturing.

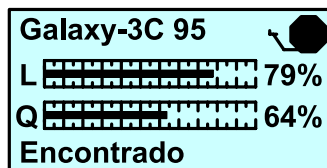

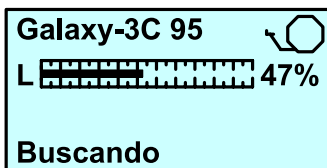

The single function button makes the EZ-SAT meter the most user-friendly meter in the marketplace. Simply press and hold to switch EZ-SAT on, press again to select your satellite, and press and hold to switch off.

The EZ-SAT uses receiver LNB power, and a battery pack, connector and carry case are available as accessories.

The USB connection and automatic driver installation makes it easy to update your meter and gives you even greater installation flexibility.

The EZ-SAT features a clear and easy-to-read backlit LCD display that has a lock indicator along with level and quality bar graphs and percentage displays.

Shown here are the displays for searching and locating your selected satellite.

**New Language Selection Function**

The EZ-SAT now features selectable on screen languages which include English, Spanish, Portuguese and French.

To select the required language tap the function button during the EZ-SAT start up screen until the required language is indicated in the lower right hand corner. The language selected will remain resident unless it is changed again during start-up.
