

PERFECT VISION®

EZ-SAT

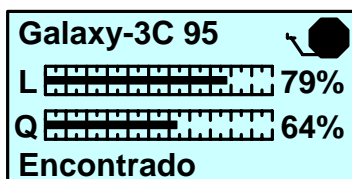

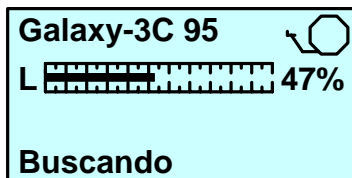

The new Perfect Vision **EZ-SAT** satellite meter utilizes the very latest developments in satellite identification technology enabling you to make your satellite installations quickly and accurately brought to you by the same manufacturers of the Perfect Vision **BIRDOG** series of satellite meters.

The single function button makes this the easiest satellite meter to use ever. Press and hold to switch on press again to select your satellite and press and hold to switch off.

The **EZ-SAT** uses receiver LNB power, but for more flexibility a battery pack, connector and carry case are available as accessories.

The USB connection and automatic driver installation makes updating your meter simple and gives you even greater installation flexibility.

The **EZ-SAT** features a clear and easy to read backlit LCD display that has a lock indicator along with level and quality bar graphs and percentage.

Shown here are the displays for searching and when you have found your selected satellite.

Selectable on screen languages include English, Spanish, Portuguese and French.

PERFECT VISION®

EZ-SAT

The **EZ-SAT** uses the receiver LNB power as illustrated above or utilizes an external battery pack accessory as shown below. The standard kit includes the following items.

F-F connecting cable
Instructions
USB lead

The **EZ-SAT** accessories are available from Perfect Vision. AA Batteries are not included. Long life alkali batteries are recommended.

Note: The **EZ-SAT** is ideal for single LNB installations and is **NOT** suitable for multi LNB assemblies such as DirecTv SWM, Dish Network 1000 or similar.
